

TRIKKE DEFENDER/POSITRON

Maintenance items:

a) Regular maintenance

- 1) Inflate air tires to max recommended pressure once every 3 weeks. 50psi front / 65psi rear
- 2) Wipe and clean the vehicle frame once every 3 weeks. Use a clean, soft cloth and general-purpose cleaner.

b) Scheduled service

- 1) Tire should last between 2000 and 3000 miles depending on proper maintenance and riding surface type. Tire and tube replacement on all 3 wheels: total 60 minutes job.
- 2) Brake pads will last between 3000 and 4000 miles, depending on the usage and terrain. Brake pads replacement: 15 minutes job.
- 3) Top off brake fluid – as needed (usually once every 1500 miles)
- 4) Check odometer total mileage on display for reference and record it.

c) Inspections

- 1) check/test steering alignment and handlebar height adjustment
- 2) check electric cables for damage and proper placement
- 3) check tire wear
- 4) check brake operation and brake pads wear
- 5) record cosmetic damage to the entire vehicle
- 6) check battery lock and proper fit on the frame
- 7) check battery integrity and confirm function
- 8) test suspension function
- 9) test lights and horn function
- 10) test drive system operation
